September 16th

Dear Sirs;

Re: Alexander Economou v Eleanor De Freitas – Southwark Crown Court 25th September 2013

We understand from your Ms Heidi Leaney that you have made representations to the CPS to review the above case with a view to asking them to take over conduct of the prosecution. We have not yet had sight of these. Please forward a copy of these submissions to us at your earliest convenience.

As the prosecutor we are duty bound to review the matter in light of any new information that comes to light. We were supplied with, on the morning of the hearing of the 11th of September 2013, a copy letter dated 9th September 2013 from the Consultant Psychiatrist treating Ms De Freitas to your firm. Given that your client appears to have been treated for bipolar disorder since 2009 please confirm whether in fact you have a medical report or medical notes on your client's condition which you can forward to us. In the alternative please confirm whether you will be seeking to serve a medical report on us in the near future.

If your client is suffering from any significant mental or physical ill health we would of course need to take this information into account when considering the public interest stage for any on going review of the matter.

We look forward to hearing from you by return.

Yours faithfully

Edmonds Marshall McMahon
